- SOFT SKILLS: Team Player [Adaptable](#) [Deliver results](#)

EXPERIENCE

Associate Software Developer Teknowledge Analytic Services Pvt. Ltd Kolkata, INDIA 05/2024 - Current

Global Application

- **Master From** – Create a master role called '**Role Master**' to define and manage all roles like Admin, Group Head, HR, IR, and more
- Built a **Mail Setup module** to configure recipients and **automate email** delivery for different business purposes.
- Generated billing reports as **PDFs using FastReport** and sent them directly to configured employees.
- Enhanced communication efficiency by ensuring timely and purpose-driven email notifications.

HRMS Application

- **Bonus Booking Mechanism** – Designed and implemented the Bonus Booking system in HRMS, including initiation and approval through the bonus booking path setup for processing employee bonuses.
- **Increment Path Setup Mechanism** – Designed and implemented the Increment Path Setup in HRMS to streamline the initiation and approval process for employee increments.
- **Tds implementation** – Developed and managed the TDS (Tax Deducted at Source) form for manual entry of salary deduction values across 12 months based on the employee's financial year.
- Developed an Employee Shifting module enabling seamless updates to designation, department, job role, and staff type.
- **Designed and delivered operational reports in FastReport** (e.g., *Employee Shifting Report*, *Approved Bonus Report*), with parameterized filters and export to **PDF** for stakeholders.
- **Designed and implemented an "Other Payment" module in HRMS** to manage additional employee allowances (e.g., tour bills and other company-related expenses).

Logistics Application

- **Integrated a Manual Ticketing module with the Logistics application**, enabling users to create, track, and manage tickets seamlessly within the ticketing system.

Ticketing Application

- **Developed a Service Desk module** to create and manage different types of service desks (e.g., *Pollution Desk* and others), with mapping to respective employees for efficient ticket assignment and streamlined support management.
- **Created master forms** such as *Ticket Status*, *Payment*, and *Ticket Type* to support configuration, standardization, and smooth operation of the Ticketing system.

EDUCATION

• Bachelor of Technology	<u>Guru Nanak Institute Of Technology</u>	Kolkata, INDIA	2019 - 2023
Information Technology	CGPA: 8.35		
• Higher Secondary (WBCHSE)	<u>Banamalipur Priyanath Institution</u>	Barasat, INDIA	2017- 2018
• Secondary (WBCHSE)	<u>Iagannathpur Arabinda Palli Bharati Vidyalaya</u>	Raikhan, INDIA	2015- 2016

PROJECTS

- DAILY BLOGS: 2024
Built a secure blogging platform integrated with **JWT authentication** and **role-based access control** (Admin/User), enabling users to create **blogs with tags**, while providing interactive engagement through features like **likes**, **comments**, and seamless content management. Designed with a secure backend in **.NET Core 9 & Entity Framework** and a responsive frontend using **JavaScript**, **jQuery**, and **Bootstrap**.
